

Marquee-5207 series systems

Out door display Marquee systems is a new innovation in the prevailing concept of the information transfer. Designed to bridge the gap between costly out door digital screens and small life span of Bulb based out door message displays, Marquee-52 systems delivers advanced large marquee features you require for your corporate business centers in a compactly styled package. Visually magnetic from 18 inches red color character size for installation at any floor of the building. Imagine being able to read messages and stock market ever changes rate at distances of 300 yards and beyond. The day / night visibility enables the product to be operated on 24 hours basis.

Lots of information to display likes latest promotions, news, offers, or features of your product. Detailed messages are no problem; Marquee systems are capable of smoothly scrolling messages of any length.
